

## Custom Handcrafted PREMIUM CARBON FIBER GRIPS

### REDLINE CARBON FIBER EXOTICS

Looking for a very impressive set of carbon fiber grips which is a little out of the ordinary? If so, you should check out our Redline Exotic Grips!

These handgun grips are handcrafted using our premium 3/8" solid plain weave carbon fiber fabric, your choice of premium hardwoods, and one or more of our "Redline" liners. Once the various layers have been cut, shaped, and professionally bonded together, each pair of grips is rounded, smoothed, and hand-finished to perfection.

Both of the handguns pictured on this page feature our Exotic grips with an "Arc" cut. The silver gun has been fitted with a pair of synthetic ivory Carbon Fiber Exotic grips with a single red liner, while the blue gun has been fitted with a pair of thuya burl Carbon Fiber Exotic grips with a dual liner (red and black).

Single Liner

Dual Liner

#### ABOUT OUR GUN GRIPS

The photographs on these pages are representative of the grain, figurative, and coloration which is generally found in a particular species of wood. However, due to the natural variations which occur throughout a block of wood, each pair of grips will be unique. Our "standard" handcrafted gun grips tend to be a little thicker (typically 30% thicker) than the stock grips provided by most gun manufacturers.

Each sample grip is shown displayed on a "stock" 45 calibre handgun. However, we routinely design and handcraft grips for a wide variety of guns. Please contact us with your specific requirements and we will be happy to design a set of grips for your specific weapon. **GUNS ARE NOT INCLUDED WITH ANY HANDGUN GRIP ORDER!**

#### PREMIUM HARDWOODS

Your handgun grips may be handcrafted out of any of the premium hardwoods shown below.

Amboyna Burl

Bubinga
