

## Custom Handcrafted SPECIALTY HANDGUN GRIPS

### GEMSTONE COMPOSITE HANDGUN GRIPS

Each set of X-CaliberGrips Gemstone Composite and Redline Composite Grips is custom designed and fabricated **at the time of order** to your specific handgun and your specific desires and requirements.

Each pair of grips is individually handcrafted using "old-world techniques" to provide you with an exceptional pair of grips. When you order a set of handgun grips from us, you will never receive a mass-produced, inferior product. You can rest assured that your grips will be a combination of the highest grade of materials, and the highest standards of craftsmanship.

If you are looking for a superior set of handgun grips, designed to fit your specific handgun to exacting standards, and demand the finest fit and finish available in the world today - contact us! Our master craftsmen will craft a set of grips which will be a quality addition to any handgun.

### REDLINE COMPOSITE HANDGUN GRIPS

#### ABOUT OUR GUN GRIPS

The photographs on these pages are representative of the characteristics and properties of the gemstone and synthetic materials shown. However, due to variations which occur throughout the materials, each pair of grips will be unique. Our "standard" handcrafted gun grips tend to be a little thicker (typically 30% thicker) than the stock grips provided by most gun manufacturers.

Each sample grip is shown displayed on a "stock" 45 calibre handgun. However, we routinely design and handcraft grips for a wide variety of guns. Please contact us with your specific requirements and we will be happy to design a set of grips for your specific weapon. **GUNS ARE NOT INCLUDED WITH ANY HANDGUN GRIP ORDER!**

#### GEMSTONE COMPOSITES

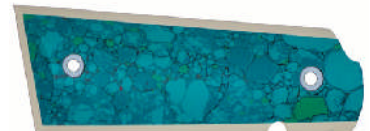

Our composite handgun grips are our premium gemstone gun grips. They are handcrafted from a mixture of the finest natural crushed stones and strong resin materials which have been carefully selected to preserve the color and beauty of the natural grains and materials.

Each pair of composite grips is offset by a synthetic ivory base plate which provides a truly unique and attractive offset between the handgun and the gemstone materials.

Three of our most popular gemstone composites are shown below. Other gemstone composite materials are available upon request.

Russian Lavender (Charoite)

Dark Turquoise

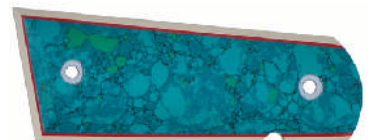

Malachite

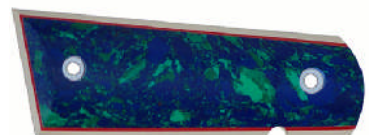

#### REDLINE COMPOSITES

Our "Redline" composite grips are accented with a single Redline liner between the gemstone materials and the synthetic ivory base. Multiple liner layers may be combined to create some truly spectacular effects.

Redline liners are available in black, grey, white, and red. The first Redline liner is included in the price of the grips. Additional liners are priced at \$15.00 per liner.

Dark Turquoise

Azurite & Malachite
