## *Custom Handcrafted* **PREMIUM CARBON FIBER GRIPS**

### **REDLINE CARBON FIBER X-TREME GRIPS**

You have seen our Exotics and marveled at our Elites, now take a look at our latest achievement in high-quality handgun grips - **Redline Carbon Fiber X-Tremes!**

Our X-Treme grips feature our beautiful 3/8" plain weave carbon fiber fabric and a synthetic ivory panel, all of which offset your choice of one of our premium hand-selected hardwoods (Amboyna Burl shown). These grips are so unique that we considered marketing them as **works of art** for your favorite firearm!

### **ABOUT OUR GUN GRIPS**

The photographs on these pages are representative of the grain, figurative, and coloration which is generally found in a particular species of wood. However, due to the natural variations which occur throughout a block of wood, each pair of grips will be unique. Our "standard" handcrafted gun grips tend to be a little thicker (typically 30% thicker) than the stock grips provided by most gun manufacturers.

Each sample grip is shown displayed on a "stock" 45 calibre handgun. However, we routinely design and handcraft grips for a wide variety of guns. Please contact us with your specific requirements and we will be happy to design a set of grips for your specific weapon. **GUNS ARE NOT INCLUDED WITH ANY HANDGUN GRIP ORDER!**

### **PREMIUM HARDWOODS**
